

Since 2013, PLUGS has been a leader in the laboratory test stewardship industry.

As a non-profit, PLUGS provides comprehensive resources and customizable solutions that improve the value and coverage of laboratory testing for all stakeholders. Our membership network includes hospitals, health systems, laboratories, insurers, patient advocacy groups, health and biotechnology companies. PLUGS has a proven track record of improving laboratory test access, ordering, retrieval, interpretation, and reimbursement.

PLUGS[®]

Patient-centered Laboratory Utilization Guidance Services

Just starting your lab test stewardship program?

Have a lab test stewardship program that's ready for the next level?

PLUGS Deep Dive Consults can help.

Deep Dive Consulting

Taking Laboratory Test Stewardship to the Next Level

SCHPLUGS.ORG

Schedule a PLUGS Deep Dive on-site consult for expert, in-depth assessment of your lab test stewardship resources and systems.

PLUGS Deep Dive Consulting

\$25,000 adjustable

Our PLUGS team includes laboratory directors, genetic counselors, and pathologists with deep expertise in laboratory medicine, procedures, and policies. We'll engage your team to identify opportunities and strategies to set a course for the next steps in your institution's lab test stewardship journey.

Deliverables *adjustable*

- + One- to two-day on-site visit by our PLUGS experts to address areas of interest.
- + Written report and recommendations.
- + Follow-up teleconferences to review the report and plan next steps.

Add-On Options

Educational Lecture

While on-site, we can present a grand rounds style lecture or speaking engagement to provide education regarding lab test stewardship to add momentum to your program's efforts.

GeneTestAdvisor

Genetic testing case management solution to support healthcare systems in effectively administering their genetic testing caseload.

Customized Consults

We will dive into areas most impactful to your goals.

Areas can include:

- Lab Test Stewardship committee structure, management, and agenda.
- Referral Lab (Send Out) services and workflows.
- Requests to send out tests performed in-house.
- Lab test kit management, collection, tracking, and billing.
- Reference laboratory vendor policies.
- Genetic and non-genetic lab test ordering patterns, volumes, data extraction, and analysis.
- Lab order review criteria and tools.
- How to measure cost savings and patient safety.
- Inpatient and outpatient orders.
- Utilizing Laboratory Genetic Counselors and Genetic Counseling Assistants.
- How genetic tests are resulted, retrieved, and interpreted.
- Laboratory formulary and clinical decision support.
- Genetic test insurance pre-authorization.
